## Concrete Protection System for Surfaces Exposed to Movement

Belzona® 4151 (Magma-Quartz Resins) is a two component system that provides a tough seamless coating suitable for protecting various substrates from moisture ingress and chemical attack. It can also be injected to accomplish repairs such as crack stabilization and shimming pump bases.

### Belzona® 4151 (Magma-Quartz Resin) will:

- Repair concrete surface and bases
- Serve as an ideal grouting and bonding system
- Provide protection from many chemicals

## Belzona® 4151

Magma-Quartz Resin

Base Plate Grouting

Decorative Flooring

Crack Stabilization

Floor Chemical Resistance

### Applications for Belzona® 4151 (Magma-Quartz Resin) include:

- Chemical containment areas
- Concrete tanks
- Stabilization of cracks and pump bases
- Underground structures
- Warehouse and production areas

Belzona® provides the solution to your repair and maintenance needs.

  
**BELZONA**  
Repair • Protect • Improve

# Belzona® 4151 (Magma-Quartz Resin) is:

## Simple

- Easy two-part mix
- Can be applied by brush, roller, squeegee or injection gun

## Safe

- Low VOC
- No tainting of food products
- Meets USDA requirements for incidental food contact
- Provides hygienic surface

## Versatile

- Can be mixed with aggregate to desired consistency
- Can be applied and cured under adverse conditions
- Resistance to environmental attack
- Excellent adhesion to many substrates
- No shrinkage regardless of thickness applied
